Human c-MET (Luc) HEK293 Reporter Cell Data Sheet

Human c-MET (Luc) HEK293 Reporter Cell

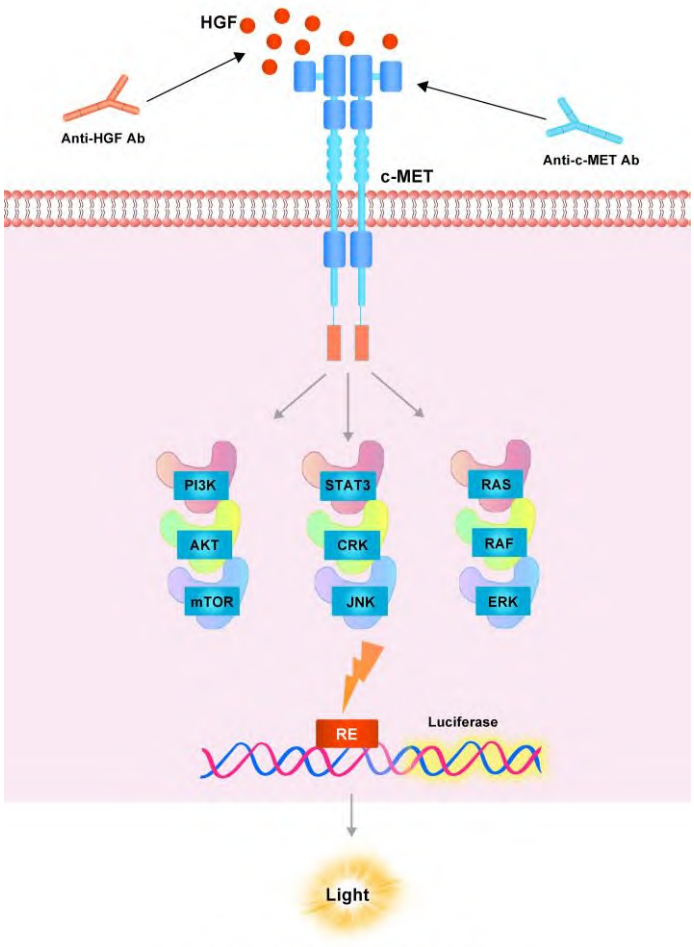
Catalog No.	Size
CHEK-ATF144	2 × (1 vial contains ~5×10^6 cells)

• *Description*

The Human c-MET (Luc) HEK293 Reporter Cell was engineered to express signaling response element driving luciferase expressing systems and human c-MET (Gene ID: 4233). When stimulated with human HGF protein, the HGF/c-MET interaction drives RE-mediated luminescence. Neutralization of biological effect of human HGF protein by corresponding antibody results in a decrease in luminescence.

• *Application*

- Screen for neutralizing antibodies blocking the stimulation of human HGF protein.



Human c-MET (Luc) HEK293 Reporter Cell Data Sheet

• *Cell Line Profile*

Cell line	Human c-MET(Luc) HEK293 Reporter Cell
Host Cell	HEK293
Property	Adherent
Complete Growth Medium	DMEM + 10% FBS
Selection Marker	Puromycin (2 μg/mL)
Incubation	37℃ with 5% CO_2
Doubling Time	22-24 hours
Transduction Technique	Lentivirus

• *Materials Required for Cell Culture*

- DMEM medium (Gibco, Cat.No.11965-092)
- Fetal bovine serum (CellMax, Cat.No.SA211.02)
- Puromycin (InvivoGen, Cat.No.ant-pr-5b)
- Complete Growth Medium: DMEM + 10% FBS
- Culture Medium: DMEM + 10% FBS, Puromycin (2 μg/mL)
- Freeze Medium: 90% FBS, 10% (V/V) DMSO
- T-75 Culture flask (Corning, 430641)
- Cryogenic storage vials (SARSTEDT, 72.379.007)
- Thermostat water bath
- Centrifuge
- Luna cell counter (Logos Biosystems, LUNA-Ⅱ)
- CO_2 Incubator (Thermo, 3111)
- Biological Safety Cabinet (Thermo, 1389)

Human c-MET (Luc) HEK293 Reporter Cell Data Sheet

• *Recovery*

1. Thaw the vial by gentle agitation in a 37°C water bath. To reduce the possibility of contamination, keep the cap out of the water. Thawing should be rapid (approximately 2 minutes).
2. Remove the vial from the water bath as soon as the contents are thawed, and decontaminate by spraying with 70% ethanol. All the operations from this point on should be carried out under strict aseptic conditions.
3. Transfer the vial contents to a centrifuge tube containing 4.0 mL complete growth medium and spin at approximately 1000 rpm for 5 minutes.
4. Resuspend cell pellet with 5 mL complete growth medium and transfer the cell suspension into T-75 flask containing 10-15 mL of pre-warmed complete growth medium.
5. Incubate at 37°C with 5% CO_2 incubator until the cells are ready to be split.

• *Subculture*

1. Remove and discard culture medium.
2. Wash the cells once with sterile PBS.
3. Add 2 mL of 0.25% trypsin to cell culture flask. Place the flask at 37°C for 2-3 minutes, until 90% of the cells have detached.
4. Add 6.0 to 8.0 mL of culture medium and aspirate cells by gently pipetting.
5. Add appropriate aliquots of the cell suspension to new culture vessel.
6. Incubate at 37°C with 5% CO_2 incubator.

Subcultivation Ratio: A subcultivation ratio of 1:6 to 1:10 is recommended.

Medium Renewal: Every 2 to 3 days.

Human c-MET (Luc) HEK293 Reporter Cell Data Sheet

• *Cryopreservation*

1. Remove and discard spent medium.
2. Detach cells from the cell culture flasks with 0.25% trypsin.
3. Centrifuge at 1000 rpm for 5 min at RT to pellet cells.
4. Resuspend the cell pellets with complete growth medium and count viable cells.
5. Centrifuge at 1000 rpm for 5 min at RT and resuspend cells in freezing medium to a concentration of 5×10^6 to 1×10^7 cells/mL.
6. Aliquot into cryogenic storage vials. Place vials in a programmable cooler or an insulated box placed in a –80°C freezer overnight, then transferring to liquid nitrogen storage.

• *Storage*

- **Product format:** Frozen
- **Storage conditions:** Liquid nitrogen immediately upon receipt

- ***Receptor Assay***

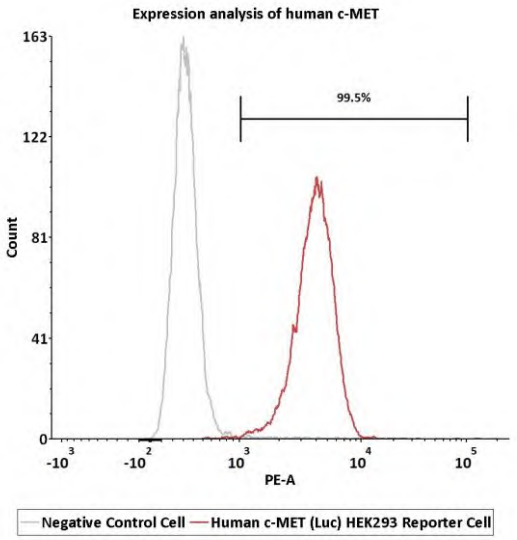

Fig1. Expression analysis of human c-MET on Human c-MET (Luc) HEK293 Reporter Cell by FACS. Cell surface staining was performed on Human c-MET (Luc) HEK293 Reporter Cell or negative control cell using PE-labeled anti-human c-MET antibody.

- ***Signaling Bioassay***

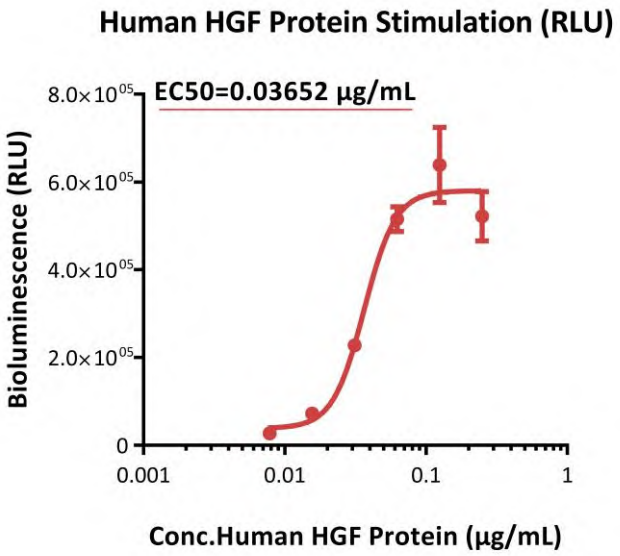

Fig2. Response to human HGF protein (RLU). This reporter cell was incubated with serial dilutions of human HGF protein. The EC_{50} was approximately 0.03652 μg/mL.

Human c-MET (Luc) HEK293 Reporter Cell Data Sheet

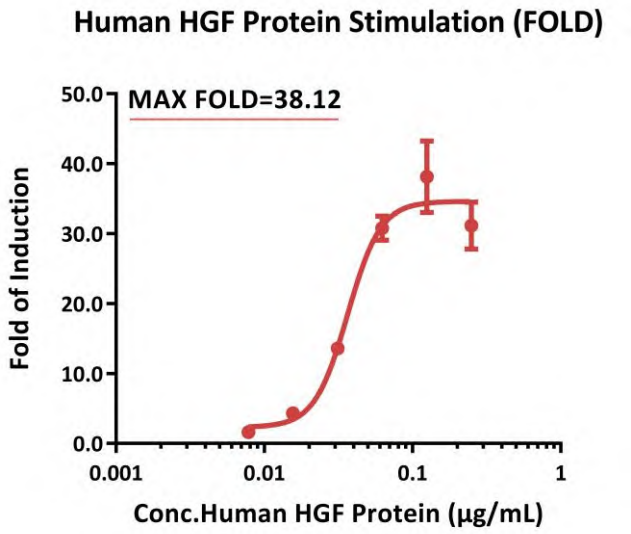

Fig3. Response to human HGF protein (FOLD). This reporter cell was incubated with serial dilutions of human HGF protein. The max induction fold was approximately 38.12.

- ***Application***

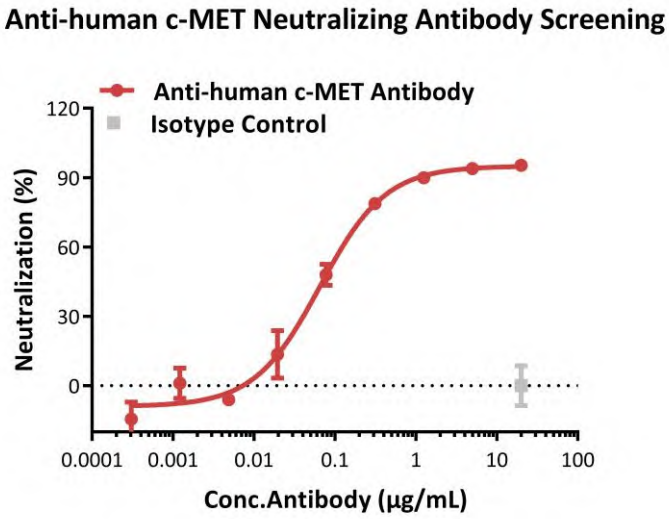

Fig4. Inhibition of human HGF protein-induced reporter activity by anti-human c-MET neutralizing antibody. This reporter cell was incubated with serial dilutions of antibodies in the presence of human HGF protein with a final concentration of 0.05 μg/mL. The EC50 of anti-human c-MET neutralizing antibody (Amivantamab) is approximately 0.06561 μg/mL.
