Catalog # UPR-M5253

#### Synonym

uPAR,PLAUR,CD87,MO3

#### Source

Mouse uPAR Protein, Fc Tag(UPR-M5253) is expressed from human 293 cells (HEK293). It contains AA Leu 24 - Pro 296 (Accession # <u>P35456-1</u>). Predicted N-terminus: Leu 24

# **Molecular Characterization**

uPAR(Leu 24 - Pro 296) Fc(Pro 100 - Lys 330) P35456-1 P01857

This protein carries a human IgG1 Fc tag at the C-terminus.

The protein has a calculated MW of 56.3 kDa. The protein migrates as 80-95 kDa when calibrated against <u>Star Ribbon Pre-stained Protein Marker</u> under reducing (R) condition (SDS-PAGE) due to glycosylation.

# Endotoxin

Less than 1.0 EU per  $\mu g$  by the LAL method / rFC method.

# Purity

>90% as determined by SDS-PAGE.

#### Formulation

Lyophilized from 0.22  $\mu m$  filtered solution in PBS, pH7.4 with trehalose as protectant.

Contact us for customized product form or formulation.

#### Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

#### Storage

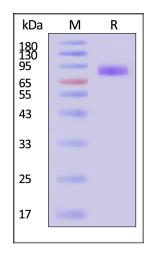

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- -20°C to -70°C for 12 months in lyophilized state;
- $-70^{\circ}$ C for 3 months under sterile conditions after reconstitution.

# **SDS-PAGE**

Mouse uPAR Protein, Fc Tag on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90% (With <u>Star Ribbon Pre-stained Protein Marker</u>).

# **Bioactivity-SPR**

# Mouse uPAR / PLAUR Protein, Fc Tag (SPR verified)

# Catalog # UPR-M5253

Human PLAU, His Tag (Cat. No. PLU-H5229) capture on NTA-Series S sensor chip can bind Mouse uPAR Protein, Fc Tag (Cat. No. UPR-M5253) with an affinity constant of 182 nM as determined in a SPR assay (Biacore 8K) (QC tested).

# Background

Urokinase plasminogen activator surface receptor (U-PAR) is also known as PLAUR, Monocyte activation antigen Mo3, CD antigen CD87. PLAUR contains three UPAR/Ly6 domains. U-PAR is expressed in neurons of the rolandic area of the brain (at protein level) and is also expressed in the brain. PLAUR / CD87 interacts with MRC2, SRPX2 and SORL1. PLAUR / UPAR acts as a receptor for urokinase plasminogen activator and plays a role in localizing and promoting plasmin formation. U-PAR mediates the proteolysis-independent signal transduction activation effects of U-PA.
